OBJECTIVE

Passionate full-stack developer seeking full time position. Looking for a company who shares my enthusiasm for building modern, stable, and performant web applications and software.

SUMMARY

- Proficient in several programming languages with specializations in front-end web development.
- Graduate from SAIT Polytechnic with exemplary grades and multiple awards.
- Active in development community through volunteering and meetup events.

EXPERIENCE - IT RELATED

Senior Developer, January 2018 - Present

Critical Mass, Calgary, Alberta

- Built and maintained multiple Node JS applications. This includes adding new features, fixing bugs, and deploying/publishing features through versions.
- Mentored junior developers and helped them map and understand their career paths.
- Helped build and maintain our existing chatbot framework which has been used on over 5 projects.

Developer, June 2015 - December 2017

Critical Mass, Calgary, Alberta

- Built multiple applications in Node JS. This included everything from reusability, scalability, unit testing, and modularity in mind.
- Built and maintained responsive configurator using Java, Groovy, Javascript, and SCSS.
- Maintained CMS using Adobe CQ software. This included making new authorable pages as well as components.
- Traveled to San Francisco to help train a team of developers for a client.

Volunteering, March 2017

HTML 150 (<http://www.thehtml500.com/en/cities/calgary>)

- Helped over 150 people interested in building their own website learn the fundamentals of HTML and CSS.

Volunteering, November 2015 - Present

Calgary Public Library

- Helped students interested in programming expand their experience by helping them learn the core concepts of programming.

Capstone Project, January 2015 - April 2015

SAIT Polytechnic and Broken City, Calgary, Alberta

- Built a point of sale system for the bar Broken City in downtown Calgary.
- Utilized several cutting edge features like HTML5 Canvas, LESS CSS preprocessing, JSON message passing, AJAX communication.
- Worked in a team of four where we used Subversion to manage our repository

EDUCATION

Information Technologies - Software Development Diploma, May 2015

Southern Alberta Institute of Technology, Calgary, Alberta

Graduated with a GPA of 3.8

<http://www.sait.ca/programs-and-courses/full-time-studies/diplomas/information-technology>

TECHNICAL SKILLS

HTML (Including several templating languages), CSS (Sass/Post CSS/LESS), Javascript (ES6/Node/React/Angular), Java (backend server/software), Databases (MongoDB/MySQL), PHP, Git. See my portfolio for a full listing.

ACHIEVEMENTS

- Milestone Certificate (1 year volunteer at Calgary Public Library) - December 2016
- Spot Bonus for being a critical member of the Nissan SaM team - February 2015
- Received Alexander Rutherford Scholarship - December 2014
- 4.0 GPA in second semester at SAIT - January 2014 - April 2014
